

Features

Adapter brackets allow alternate Simplex® 4100ES module sizes to mount in Slots 1 and 2 of the CPU bay for single bay cabinets:

- For applications where CPU bay Slots 1 and 2 are not otherwise assigned
- **Bracket 4100-9852** supports up to two, single block (4 x 5) modules; or one, dual block (4 x 10) module
- **Bracket 4100-9853** supports an IDNet+ module (4100-3107)
- Slots 1 and 2 are commonly used for: DACT, Physical Bridge, VESDA Interface, IDC Modules, or Dual RS-232 Modules

Bracket 4100-9852 Reference Drawing

Description

CPU Bay Slots 1 and 2, module reference. Single bay 4100ES cabinets are selected when the fire alarm control features required at that location are compatible with the capacity of that cabinet size. CPU bay Slots 1 and 2 are commonly used for the following modules: DACT, Physical Bridge, VESDA® Interface, IDC hardwired connections, or Dual RS-232 connections. When these modules are not required, Slots 1 and 2 are available for expansion modules by selecting either bracket 4100-9852 or 4100-9853.

Bracket 4100-9852 allows mounting of one, or two, single block, 4" x 5" (102 mm x 127 mm) modules, or of one, 4" x 10" (102 mm x 254 mm) dual block module.

Bracket 4100-9853 allows mounting of one, 4100-3107 IDNet+ module.
