

TrueAlert® Addressable Notification Appliances

UL, ULC, CSFM Listed; FM Approved;
MEA (NYC) Acceptance*

Multi-Candela Visible Only (V/O) Appliances
with TrueNAC™ Voltage Drop Diagnostics

Features

Individually addressed and controlled multi-candela V/O (visible only) notification appliances provide:

- High intensity multi-candela xenon strobe with intensity **programmable from a Simplex® 4100U fire alarm control panel with TrueAlert Addressable Power Supply (TPS)** or jumper selected as 15, 30, 75, or 110 cd
- Synchronized 1 Hz strobe flash rate
- Wiring supervision to each appliance allowing “T-tapped” connections for Class B circuits to simplify wiring (Class A circuits require in/out wiring)
- Backwards compatibility with fixed candela TrueAlert addressable strobes on same Signaling Line Circuit (SLC) allowing convenient expansion and replacement
- Compatibility with ADA requirements; (refer to important installation information on page 4)
- UL listed to Standard 1971

Compatible TrueAlert Addressable Host Controls:

- **4100U TrueAlert Addressable Power Supply (TPS)** mounted in the control panel or in a remote cabinet
- **TrueAlert Addressable Controller (4009T)** interface panel

With multi-candela appliances and 4100U fire alarm control panels with TPS, TrueNAC™ voltage drop diagnostics provide:

- **Individual appliance voltage drop analysis** using appliance intensity selection, measured appliance voltage, and SLC output voltage and current**
- **Device Reports** that detail type, candela rating, and location of addressable appliances on the SLC (*also available with TrueAlert Addressable Controller connected to 4100U using RUI communications*)
- **Status Reports** that list the diagnostic results per appliance on the SLC (see details on page 2)
- Requires 4100U Software Revision 12.04 or higher and compatible TPS version

LED indicator and magnet test feature:

- Appliance LED can be selected to display each polling cycle to indicate appliance supervision
- In diagnostic mode, the magnet test pulses the LED to indicate appliance address **AND pulses to indicate the intensity selection**; a brief output of the strobe is also selectable to confirm operation

Mechanical design features:

- Rugged, high impact, flame retardant thermoplastic housings are available in red or white for flush or surface, wall or ceiling mount
- Rear of housing does not extend into box and easily mounts to standard electrical boxes
- Access to wall mount in/out wiring terminals (18 AWG to 12 AWG) from front of housing assists installation, inspection, and testing
- Mounting options include electrical box adapters, separate covers to convert color, and red wire guards

Wall and Ceiling Mount Addressable V/Os

Description

TrueAlert Addressable Multi-Candela Strobes are individually addressed and individually controlled with power, supervision, and control supplied from a TrueAlert Addressable SLC.

4100U Additional Features. When controlled from a Simplex 4100U control panel with TPS, additional features are available such as software selection of strobe intensity, detailed reports of actual appliance intensity selection (see sample reports on page 2), TrueNAC voltage drop diagnostics, and additional setup and test diagnostics (further detailed on page 2).

Strobe Intensity Selection

Selectable at Appliance or Remotely Selected.

During installation, a plug at the back of the housing (visible after installation) is inserted to select strobe output as 15, 30, 75, or 110 cd; **or FACP**. *FACP is the factory default setting and allows a 4100U control panel with TPS to program the output intensity.*

FACP Selection Advantages. When intensity is selected in software from a 4100U fire alarm panel, it can be easily changed if renovations or other usage conditions are revised, and intensity selection errors at installation are effectively eliminated.

* See page 3 for wire guard listings. This product has been approved by the California State Fire Marshal (CSFM) pursuant to Section 13144.1 of the California Health and Safety Code. See CSFM Listing 7125-0026:235 for allowable values and/or conditions concerning material presented in this document. It is subject to re-examination, revision, and possible cancellation. Accepted for use – City of New York Department of Buildings – MEA35-93E. Additional listings may be applicable: contact your local Simplex product supplier for the latest status. Listings and approvals under Simplex Time Recorder Co. are the property of Tyco Safety Products Westminster.

** TrueAlert addressable notification is protected under U.S. Patent Nos. 6,313,744; 6,426,697; 6,693,532; 7,006,003; and 7,091,847. TrueNAC diagnostics are protected under U.S. patent No. 7,333,010.

Strobe Application Reference

Proper selection of visible notification is dependent on occupancy, location, local codes, and proper applications of: the *National Fire Alarm Code*® (NFPA 72®), ANSI A117.1; the appropriate model building code: BOCA, ICBO, or SBCCI; and the application guidelines of the Americans with Disabilities Act (ADA).

TrueAlert Addressable Advantage

TrueAlert Addressable Operation provides separate audible and visible appliance control functions using a single two-wire circuit that also *confirms connection to the individual notification appliance's electronic circuit*. This operation increases circuit supervision integrity by providing supervision beyond the appliance wiring connections.

Opportunities for Reducing Installation and Testing Time. Separate controls carried on the same two-wire SLC can significantly reduce installation time and expense for both retrofit and new construction. When Class B (Style 4) wiring is used, *wiring can be T-tapped*, allowing savings in distance, wire, junction boxes, and overall installation efficiency. In addition, TrueNAC diagnostics further improve installation efficiency by analyzing individual appliance wiring connections.

Addressable Product Reference

TrueAlert Addressable Diagnostics

Appliance Type and Intensity Check. The TrueAlert Addressable Host Control is programmed with address, location, device type, and intensity selection. An incorrect appliance replacement or substitution will produce a location specific trouble allowing easy correction.

LED Communications Indicator. The host control can be selected to pulse each appliance's LED when it receives a supervision poll. This feature can be left on continuously, or activated for system testing.

Silent Mode Appliance Magnet Testing. In this test mode, the local magnet test activates the appliance LED to pulse sequentially to indicate the appliance's address *and* to indicate the appliance's strobe intensity selection.

Operational (non-silent mode) Appliance Magnet Test. When this test mode is selected at the host control, after the address and intensity selection is indicated, the strobe will flash once to indicate proper operation.

4100U TrueNAC Diagnostic Operation

Individual Appliance Performance Analysis. With appliances on the SLC activated, each appliance measures its terminal voltage and reports it to the 4100U TPS where its address and appliance type is stored in memory. The 4100U TPS measures its output voltage and current and then iteratively analyzes all of this information against known appliance power requirements to determine equivalent impedance to each appliance. TrueNAC diagnostics then analyze each appliance's wiring connection for performance under worst case conditions and identifies problems by appliance address.

TrueAlert Device Reports detail type, candela rating, and location per appliance (first sample below). Fixed candela appliances will also report, but are not compatible with TrueNAC voltage drop diagnostics.

TrueNAC Status Reports detail the diagnostic results as shown in the second report example below.

Product Selection

Multi-Candela Addressable Strobe

Model	Mounting	Housing Color	“FIRE” Lettering	Dimensions	Description
4906-9201	Wall	Red	White	5-1/8” H x 5” W x 2-3/4” D (130 mm x 127 mm x 70 mm)	Multi-Candela Addressable Strobe; intensity selectable as: 15, 30, 75, or 110 candela
4906-9203		White	Red		
4906-9202	Ceiling	Red	White	4-3/4” x 2-5/16” x 2-5/8” D (121 mm x 75 mm x 67 mm)	
4906-9204		White	Red		

V/O Adapters (see diagram on page 4)

Model	Description	Dimensions
4905-9937	Red Wall Mount, Surface Mount Adapter Skirt; use to cover 1-1/2" (38 mm) deep surface mounted boxes	5-3/8" H x 5-1/4" W x 1-5/8" D (136 mm x 133 mm x 41 mm)
4905-9940	White Wall Mount, Surface Mount Adapter Skirt; use to cover 1-1/2" (38 mm) deep surface mounted boxes	depth with strobe = 4-3/8" (111 mm)
4905-9931	Wall Mount, Red Adapter Plate for mounting to Simplex 2975-9145 box (typically for retrofit, may be mounted vertical or horizontal)	8-5/16" x 5-3/4" x 0.060" Thick (211 mm x 146 mm x 1.5 mm)
2975-9145	Wall Mount, Red Mounting Box, requires Adapter Plate 4905-9931	7-7/8" x 5-1/8" x 2-3/4" D (200 mm x 130 mm x 70 mm)
4905-9910	Ceiling Mount, Surface Mount Adapter Plate, zinc plated; required for ceiling surface mount	4-7/8" x 3-1/8" (124 mm x 79 mm)

Replacement Covers for Wall Mount Strobes

Model	Description	Dimensions
4905-9992	Red cover with white "FIRE" lettering	5-1/8" H x 5" W x 1-1/2" D (130 mm x 127 mm x 38 mm)
4905-9993	White cover with red "FIRE" lettering	

Wire Guards (see diagram on page 4)

Model	Description	Dimensions
4905-9961*	Wall Mount Red wire guard with mounting plate, compatible with semi-flush or surface mounted boxes	6-1/16" H x 6-1/16" W x 3-1/8" D (154 mm x 154 mm x 79 mm)
4905-9926*	Ceiling Mount	6-1/8" x 4-3/8" x 2-7/8" (156 mm x 111 mm x 73 mm)

* UL listed by Space Age Electronics Inc.

Addressable V/O Specifications

Wall Mount or Ceiling Mount, Common Specifications

Rated Voltage Range	UL Listed Rating	Special Application, 17 to 31 VRMS, see Note 1 below			
	ULC Listed Rating	21.25 to 28.2 VRMS			
Supervisory Requirements		1 unit load			
Strobe Flash Rate and SLC Loading		1 Hz; with up to 46 synchronized addressable strobes maximum per SLC			
Environmental; Temperature and Humidity		32° to 122° F (0° to 50° C); 10% to 93%, non-condensing at 100° F (38° C)			
Terminal Block Connections		18 AWG to 12 AWG (0.82 mm ² to 3.31 mm ²); 2 wires per terminal for in/out wiring			

Wall Mount Current	Housing Dimensions (with lens)		5-1/8" H x 5" W x 2-3/4" D (130 mm x 127 mm x 70 mm)			
	Maximum RMS Current Rating per Strobe Intensity (see Note 2)		15 cd	30 cd	75 cd	110 cd
			64 mA	98 mA	187 mA	253 mA
	RMS Currents at other voltages (Reference)	18 VRMS	60 mA	93 mA	177 mA	239 mA
		24 VRMS	45 mA	69 mA	132 mA	179 mA
Ceiling Mount Current	Housing Dimensions (with lens)		4-3/4" x 2-5/16" x 2-5/8" D (121 mm x 75 mm x 67 mm)			
	Maximum RMS Current Rating per Strobe Intensity (see Note 2)		15 cd	30 cd	75 cd	110 cd
			76 mA	128 mA	242 mA	328 mA
	RMS Currents at other voltages (Reference)	18 VRMS	72 mA	121 mA	229 mA	310 mA
		24 VRMS	54 mA	91 mA	171 mA	232 mA

NOTES:

- "Special Application" refers to the operating category under UL Standard 1971, *Signaling Devices for the Hearing Impaired*. The rated voltage range listed is the absolute operating range. Operation outside of this range may cause permanent damage to the appliance. Please note that 17 VRMS is the lowest operating voltage that is allowed at the last appliance on the TrueAlert signaling line circuit under worst case conditions.
- The maximum RMS current listed is the appliance nameplate rating. Strobe designs are constant wattage and the maximum RMS current rating occurs at the lowest allowable operating voltage.
